

**A JV of PSA Marine (Singapore) and Golden Dunes International LLC  
to provide Towing Services for Oman LNG**

PSA Marine has won the tender to provide towing services for Oman Liquefied Natural Gas LLC (Oman LNG) in Sur, in northeastern Oman. This achievement comes amid strong competition from noteworthy international towing players.

A long-term contract was signed with Oman LNG on 13 January 2014 in Sur and PSA Marine's services will commence in January 2015.

Oman LNG was established in 1994 by a royal decree from His Majesty Sultan

Qaboos bin Said to harness the country's gas resources for export. Oman LNG's three plants in Sur on the coast of the Gulf of Oman has a nameplate capacity of 10.4 million tonnes of LNG per annum.

This win will expand PSA Marine's global portfolio and strengthen its competitive edge for further opportunities in that region. Congratulations to our colleagues in PSA Marine for continuing to push boundaries and enhance PSA's presence in the Arabian peninsula.
